About This Game

Battle evil as old as time itself and save mankind from demonic forces in this thrilling hidden object adventure! Kate is a modern woman who still suffers from nightmares about her mother's death years earlier at the hands of a terrifying monster. After a visit to a therapist, her life takes a sudden and unexpected turn when more of the creatures show up at her apartment door, intent on killing her, too.

In the tradition of popular action films featuring strong female characters, guide Kate through an exhilarating escape sequence and then join her on a remarkable journey of discovery as she becomes part of a secret order of female warriors who struggle against these dark forces to save mankind. Learn to use her weapon, the Chakram, to not only eviscerate evil but also solve puzzles, go back in time to when the Order was young to cut off the demons at their knees, and solve the mystery of Kate's amazing destiny. Packed with rich interactivity, stunning animation, and unique hidden object scenes, Dark Angels: Masquerade of Shadows will captivate you from beginning to end!

Title: Dark Angels: Masquerade of Shadows

I would like to start off by saying that this game is just not good. Story doesnt make any sense at all, theres no run key, and its not even scary. Its more of just suspende than it is scary. Thank god i only paid $2.39 for this game because it is crap.. ESCHATOS is basically the sequel to JUDGEMENT SILVERSWORD, which was a homebrew wonderswan color game that has also been released on steam (it's pretty fun too). All the systems from that game return, but with greater refinement. There's a really enjoyable time attack mode which starts off seemingly easy and gets increasingly frantic as you realize you don't really have as much time as you thought; there's multiple difficulties as well. The main gimmick is a shield which blocks shots but also turns them into a rotating damage-dealing swarm of purple things. Drop your shield and the purple gems grant you points, which increase over the course of the game -- it's a fun mechanic and offers a smart way to do risk-reward, since the shield can also be used to cheat your way through some difficult curtains if you haven't worn it down trying to net extra gems for your scoreboard. Also the music is good! Buy this game. As a fan of retro pixel style games, I can say that this game was fantastic! It has an interesting story and multiple alternate endings. It's a simple game platform but the story makes you want to come back and play again. Overall a great game that I would recommend to other pixel game horror\/puzzle fans!!. Fun little game..never before have I had to pull my headset off when one of the spiders jumped at my face..screamed like a girl, to my daughters amusement..\ud83d\ude02\ud83d\ude02. The FFB is finally "real". I hope that it will be better, but it's better than nothing... Thx for that, but why I don't see any settings about that? The physics sould be better, maybe next year. The AI is good and fun. The graphics is average.

Nascar Heat 3 is a good game. Not better than F1 2018, but enjoyable. Maybe this is just the beginnings.

The game is running well. It's fast and responsive.

But some things what I see I don't understand. Some example: the driving line is on in practice. Why? I don't need it! And in practice again: I don't see the others list of times just in the qualification.

I wait long time ago for the AI of iRacing, but I think it's is a good options for the another enjoyable game. I hope in the next few years it will improvement so many way, and I promise that I will buy all of them.

Just please not forget the phisycs and FFB!. Camp Sunshine is a great tiny little indie RPG Horror. There's no fighting enemies like other RPGs, but instead you just have to make your way through the game tracking down Diary Pages. This in itself is not so bad, but I found myself becoming lost occasionally with no aim as to what or where to go and what to do next... it can get really annoying, especially for those of us who don't like the pacing of the game to falter just because we can't find ONE thing.

The game also crashes a bunch, most of the time when entering a building. This is especially frustrating when you haven't saved in awhile.

The game as a whole is enjoyable. There's some VERY AWESOME 80s shout-outs to horror. I think the Easter Eggs by themselves were probably my favorite part about the game. I just wish Fossil Games would have ironed out the bugs first.. If you like tower defense you will love this game! Very fresh and very pretty. Amazing cel shaded graphics and robot characters reminiscent of Borderlands' clap-trap but sans the annoying voice.. makes a good game great! waited so long for a good sale. but totally worth it! yes it looks the same, but it feels and plays differently. probably the best time i have ever had with any streetfighter game, with the exception of streetfighter vs tekken!. it's a terrible game, no creativity at all. If I could refund it I would but I got it in a bundle with a game that I did want and do enjoy. I pretty much paid 50 cents for this and it's not even worth that. It's clunky, if a level if badly constructed you can't skip it. It's also got ugly rats :/ I was hoping on this being a casual bridge builder but, it being a children's game you can't even use as many bridge pieces as you want when the game mechanics are failing you (to use an alternative route)

it's like a 2/10 maybe. It did give me three trading cards in a fairly short time period *sigh* (that's the only reason I put 30 minutes in it instead of 8)

i dont even know why i bought this.. oh wait because i am ♥♥♥♥ing rich. Not much of an update. My problem is we were promised this back around march and now it's september. You would think in all that time they could make a complete carset instead of just throwing a couple of schemes into a game that will now be irrelevant in two weeks time.. This is love!!!. It's unpolished and not what I expected but I ended up really liking the game and was even a little sad because I completed it. The thing that makes this game stand out from other match-3 games that I've played is that you can move pieces diagonally. There's also no timer for the main mode so it was fun to just chill out to my own music and enjoy the gentle brain tease.. I like it its fun :D. Pretty cool, but short (3.5h-4h) Serious Sam 2D platformer/shooter where he obliterates everyone and everything with his 6 pack of guns.

Fast paced action. Levels with many secrets. Corny, but funny dialogues. Huuuuge bosses and some very weird camera angles which can make you squint a little bit.

Yeah, this game is stupid and over the top, but it's fun.

"Half dead" has been released!:
http://steamcommunity.com/app/434730/

We hope you will enjoy playing the game!. **Release on this Friday!**:
Yes, 20 hours before the release, finally!
Everyone will be able to buy and pass Hentai Hexa Mosaic on Friday evening, and if you want a cool soundtrack by HateBit!.
Hotfix v0.0.7.3:
Here's another small batch of fixes to the editor and new fighter.

A lot of people had problems with the game shutting down when HMDs turn off from inactivity. I changed the editor scene so that VR will not be required, and it is safe to let the VR set shutoff or even quit SteamVR while in the editor. The VR system should automatically come back on when exiting the editor or launching the mission.

The flight model of the F/A-26B is something I'll continue to experiment with, but since it was very easy to fall into an unrecoverable spin, I made it a bit more stable and adjusted the flight assist to help prevent you from spinning out when rolling at high angle of attack. Please let me know what you think!

- Adjusted F/A-26B aero to increase roll rate and control under high AoA- Fixed: Game crashes when in editor and SteamVR shuts down (now safe to close SteamVR when in editor)- Fixed error causing black screen when save file has invalid data- Fixed missing equipment sometimes when re-arming in custom missions- Fixed issues when launching mission from editor with brand new save file- Fixed weapon configuration not saving when testing mission from editor- Running mission from editor without equip configuration now launches loading scene. **Patch 0.9.1.7 for the Beta**:
I just released the patch fixing error with Russian lines not translated as due, also fixing two painful bugs with one of conversations.. **3.18.6.0 Update Notes**:

Lobbies:. **Solution to Launch Problems!**:
Hiya guys.

So while preparing Snares of Ruin Zero for release, I've managed to find out what's going on with launch problems that some people have been experiencing.

As I mentioned in some discussion threads before, there is a third party program called Node js (Nwjs) that is required as a launcher for this game (and other more recent games of mine: Pegasus-5, Snares of Ruin, Renegade Grounds, and will also be for Snares of Ruin Zero). This program together with one of the plugins is required for integration of Steam achievements. Unfortunately from what I've been testing today, the newer versions of Node js give a lot of problems and often don't trigger achievements (possibly due to conflicts with other plugins). So, as of right now, staying with version 22.3 of Node js is the best bet to make sure achievements still trigger.

However, if the computer has used a newer version of Node js for running of other games, then it could cause launch problems of games that used older version of Node js. There is a handy fix that can allow you to stop this from happening.

You have to go to the following folder:

C:\Users\(your username here)\AppData\Local\KADOKAWA\RPGMV\UserData\Default

And then scroll all the way down and locate two files:
"Web Data" and "Web Data-journal", and DELETE them.

This will stop the override and will allow your computer to run games that use any version of Node js that's older than the whichever is the newest version you used.

If you happen to run a game later that uses a newer version of Node js, then you might have to do this fix again as the "Web Data" and "Web Data-journal" files will reappear and constantly auto-update based on what version of Node js you've been using.

Just a note - AppData folder is normally hidden on your computer, so you'll first have to 'show hidden folders' from your computer's Control Panel.

I hope this helps, and please feel free to ask any questions if you're still stuck.
The alternative solution that was mentioned before is to launch the game via Firefox browser (by going into game folders and launching it through the file called 'index').
