Finally! A card game that has no storyline and no multiplayer! You can make up your own story and let the imagination flow. No multiplayer = you are the best and no one needs to cheat to best you. The training teaches you the basics and I understand how it is to have English as a 2nd or 3rd language. However, it turned out to be fun to read (not laughing at mistakes, but the way humor presented itself). You can then easily figure out what to do and edit your deck accordingly. Then you get excited over new cards and new levels of cards! And I LOVE grinding! So hooray to having lots of opponents to train on and practice your skills.

Can this game be better? I already think it is good for its price. It offers way more content than some other games for the same pricing. BUT if the Creator chooses to expand on some areas, that is their choice.

Thank you for making this game - I can't wait to play more of it. :))) I've had fun playing this game for over 15 years, and it continues to be fun. I enjoy playing the solo games, but I like "screwing" my friends over and forcing them to attempt to answer questions they don't know the answers to. Jack Attack is probably the thing I'm best at, both with knowledge and with fast fingers!. Get used to dying, you are going to be doing lots of it.

<https://www.youtube.com/watch?v=ynUxn7n1Qxo>. Very good software. very slow updates. but contain quite abit of stuff in them that it does not matter. And you might want to get a graphics tablet.. awesome game if you like 16 bit games. Developer very responsive.

[18 months later no more updates. i feel abandoned.](#)

[2 years after the game is up. we get new content.. this games video looks fun to play I like toe idea of building a base and mining etc. but in the cuurent state I will have to warn anyone that this game is not what the video shows not even close. not to mention there is no tutorial now I have been fiddling around but I cant figure out heads from tale.](#)

[The english thing I can look past since they did say the translation is not done but I always wonder what goes through a developers mind when you try to launch a game when the main accept language in the world is not even in your game. to me it feels like yoru aiming low or dont care.](#)

[Wont refund. as I do support there idea. but will keep this as a negative rating till I see some form of improvement.](#)

10V10 better than fortnite would buy again. Awesome. It's been almost a decade since I last played this game on a Playstation Magazine demo disk, and the game is still as good, if not better than I remember. The challenge is just as great, and the game is just so much fun to mindlessly play for hours. I absolutely recommend buying this game if you ever played the original Gravitation, and I still recommend it even if you didn't. Amazing work.. I am sure this is a very good game. But I am just not into these types of games. Best game ever!

I can't stop laughing playing this game with my cousin!

I love this game!. 1HEART is a puzzle game, surrounding Two young children who were left at home alone and the nightmare-adventure that followed. The concept is interesting, creepy, and compelling. Visually speaking the game is static, but detailed. The sound effects give it a creepy ambience. It's not bad for a puzzle game, and the horror aspect is a pretty cool idea.. I really like this dash game. It is very funny and exciting to play and the endless shift NEVER gets boring.. **Is this as good as Tetris: No. Is this as good as Dr. Robotnik's Mean Bean Machine: Nope. Is this good enough to merit 3-4 dollars? I suppose.**

While Anode immediately conjures images of Tetris, it is fairly distant. Yes the blocks drop faster and faster, and you must arrange them in particular ways to clear space, but that is where the comparison ends. Overall, it feels a bit forced - let me explain through a set of Pros and Cons.

Cons:

-In Tetris you need to pack the blocks in as close as possible to clear lines - this is not the case here, because its not lines that move you forward - it is connections (whether they are diagonal, horizontal, or vertical). This gives the Tetris illusion, but really there are different dynamics at play.

-Being colorblind, it is very difficult to tell between green and yellow - there is no reason why this cannot be fixed. This also applies to the 'wildcard' glowy block\diamond. All of the ones that shine are not easy to tell what it is in a quick situation.

-There is very little innovation here, the items are totally uncreative (ie. 'clears half green blocks') and were probably something that could have been dreamt up on the spot. They also are not really fun - you just use them when you are in trouble, more-or-less.

-Stock controls could have been better thought out (arrow up for rotate one way, right shift to rotate the other?)

-Graphics are fairly poor and look dated

Pros:

+Local co-op

+Leaderboards

+Achievements, I suppose

It took me many hours to appreciate Dr. Robotnik's Mean Bean Machine (Tetris was almost instant), so maybe I just need to play more of this. I will give it more time, especially with co-op, but at this point I have played enough to tell you that it is no rare gem. You get what you see in the trailer, and playing it is not really much better than it looks.

Peace,
